Summary

Software Engineer with 3+ years of experience building enterprise and customer-facing applications across MIS, ERP, CMS, Recruitment, Logistics, and E-commerce domains. Specialized in Frontend Engineering with React.js, Next.js, Vue.js, and TypeScript, with experience leading architecture decisions, mentoring engineers, and collaborating with cross-functional teams to deliver scalable products.

Education

- **Master of Software Engineering (AI)** – FPT School of Business & Technology Sep 2025 – Now
- **Bachelor of Software Engineering** – FPT University, Ho Chi Minh City Nov 2019 – Dec 2023

Languages

- **English:** Intermediate level (able to communicate effectively in a work environment) ~ 650 TOEIC

Awards & Achievements

- **Employee Performance Rating: Good-Very Good** – THACO Group 2025
- **Highest Master's Scholarship** – FPT University 2025
- **Honor Student of the Semester** – FPT University 2021
- **Second Prize – F-Voice Contest** (Drama about Vietnamese history) – FPT University 2020

Skills

- **Frontend:** React.js, Next.js, Vue.js, React Native, TypeScript, JavaScript
- **State Management & Data:** Redux Toolkit, Zustand, React Query
- **UI & Performance:** Tailwind CSS, Material UI, Ant Design, Responsive Design, Performance Optimization
- **Architecture:** Micro-Frontend, Clean Architecture, Scalable Frontend Systems
- **DevOps & Quality:** Docker, Nginx, Azure DevOps, Cypress, Storybook
- **Product & Leadership:** Product Owner, Mentorship
- **Backend & Database:** Node.js, NestJS, FastAPI, REST APIs, MS SQL, MongoDB

Experience

Software Engineer, THACO Group

Feb 2025 – Present

- Developed and delivered AI Proof-of-Concept initiatives, including AI-powered IT ticket automation that reduced manual processing effort by **80%**, enterprise AI assistants built with Dify.ai, and document collaboration platforms based on Seafile and OnlyOffice.
- Designed, developed, and maintained enterprise web applications supporting more than **60,000** employees across **6+** corporations, delivering solutions for digital operations, workflow automation, and internal collaboration.
- Contributed to Microfrontend architecture, shared UI libraries, and frontend engineering standards, improving code reuse, maintainability, and development efficiency across multiple teams.
- Served as a key technical contributor by mentoring new engineers, establishing development guidelines, conducting code reviews, and supporting project delivery across enterprise-scale systems.

Product Owner & Front-End Engineer, Phuc Nguyen Trading and Export Co., Ltd.

Jan 2026 – Present

- Defined product vision and roadmap for an electronics e-commerce and logistics platform operating at warehouse-level pricing, aligning business requirements with system implementation.
- Led frontend architecture and development as the primary Frontend Engineer, driving technical decisions, UI structure, and implementation across core product modules.
- Collaborated closely with engineering, marketing, and operations teams to translate business workflows into scalable product features across sales, inventory, and logistics systems.

Front-End Engineer, TopDev (DaouKiwoom Innovation)

Feb 2024 – Feb 2025

- Developed core features for TopDev's recruitment platform serving candidates and employers.
- Implemented micro-frontend architecture to improve scalability and accelerate feature delivery.
- Worked closely with product and engineering teams to deliver business-driven solutions and technical improvements.

Front-End Developer, FPT Software (Intern)

Sep 2022 – Feb 2023

- Participated in a company project with a Japanese client.
- Learned deployment and software development processes.
- Supported the Tester/QC team in Unit Testing and Integration Testing phases.

Project Experience

Office Operations Management System - THACO Group

Feb 2025 – Present

- **Position:** Software Engineer
- **Tech Stack:** Node.js (Express), TypeScript, React.js, Vite, Redux Toolkit, Tailwind CSS, Ant Design, Material UI
- **Team Size:** 6 members
- Served as the primary engineer for two enterprise products: an E-Signature Platform and a Meeting Room Booking System, supporting more than 60,000 employees across THACO Group.
- Designed and implemented a Microfrontend architecture with shared UI libraries, establishing development standards and accelerating feature delivery across teams.
- Led technical implementation, code reviews, and architectural decisions while mentoring and onboarding new engineers.
- Developed and maintained digital signature workflows, including template-based and dynamic signing processes, helping reduce processing time and paper-based operations.
- Designed and enhanced meeting room booking workflows, improving resource utilization and internal collaboration efficiency.
- Authored technical documentation, coding standards, and deployment guidelines to improve maintainability, onboarding efficiency, and cross-team collaboration.

THACO AUTO MIS - THACO Group

May 2025 – Present

- Served as a key Frontend Engineer, designing and maintaining the frontend architecture for enterprise MIS platforms used across manufacturing, sales, and business operations.
- Developed reusable dashboard and reporting modules with role-based access control, supporting multi-company, multi-region, and position-based authorization models.
- Built high-performance data visualization and analytics features for vehicle sales, manufacturing, parts, and service operations, enabling real-time business monitoring.
- Led frontend implementation, production deployments, source code maintenance, bug fixing, and technical support while ensuring system stability and scalability.
- Collaborated with business stakeholders and backend teams to translate complex operational requirements into maintainable frontend solutions.

Personnel Evaluation System - THACO Group

Jun 2025 – Dec 2025

- **Position:** Software Engineer
- **Tech Stack:** TypeScript, React.js, Vite, Tailwind CSS, Ant Design, Redux Toolkit
- **Team Size:** 6 members
- Co-designed the frontend architecture, source code structure, and development standards to ensure scalability and maintainability.
- Developed core modules including user management, organizational hierarchy, and role-based permission systems for THACO Group and its six member corporations.
- Built evaluation cycle management, employee assessment, and configurable evaluation criteria workflows to support enterprise-scale performance reviews.
- Implemented aggregation dashboards and reporting features, enabling management to analyze evaluation results across multiple business units.
- Conducted code reviews, maintained code quality standards, and collaborated with backend teams to deliver stable and scalable releases.
- Contributed to process digitalization, improving transparency, reducing manual effort, and enhancing user experience across the evaluation lifecycle.

Product Owner & Front-End Engineer, Phuc Nguyen Trading & Logistics

Jan 2026 – Present

Products: dienmayphucnguyen.com – phucnguyenlog.com

- Defined product strategy and execution for electronics e-commerce and logistics platforms, aligning business goals with technical delivery.
- Collaborated with engineering, marketing, and operations teams to gather requirements, prioritize features, and manage product roadmaps.

- Served as the primary Frontend Engineer, leading frontend architecture, implementation, and technical decisions across multiple products.
- Drove initiatives across inventory management, order fulfillment, logistics operations, and customer experience optimization.
- Mentored engineers, established development standards, and ensured timely delivery of scalable and maintainable solutions.

Topdev.vn - Daoukiwoom Innovation

Feb 2024 – Feb 2025 Product: topdev.vn

- Developed and maintained frontend features for a recruitment platform for candidates and employers, including job listing pages, profile screens, and application workflows.
- Implemented UI components and improved user experience using React.js and Next.js under guidance of senior engineers.
- Supported performance improvements through basic optimization techniques such as lazy loading and code splitting.
- Collaborated with product, backend, and SEO teams to deliver features aligned with business requirements.

Online Booking System - FPT Software - Intern at BU

Sep 2022 – Feb 2023

- **Position:** Front-End Engineer
- **Tech Stack:** Typescript, React.js, Redux Toolkit, single-spa, MS SQL
- **Team size:** ~ 200 members
- Developed a web-based room booking system with over 40 advanced filters.
- Applied mobile-first design principles.
- Supported QA and Tester teams to ensure product quality.

Certifications

- **Cloud & AI**
 - Automate Data Capture at Scale with Document AI – Google Cloud Skills Boost (2025)
 - Build Custom Processors with Document AI – Google Cloud Skills Boost (2025)
 - Prompt Design in Vertex AI – Google Cloud Skills Boost (2025)
 - Enhance Gemini Model Capabilities – Google Cloud Skills Boost (2025)
- **Project & Process Management**
 - Google Project Management – Coursera (2024)
 - Software Development Lifecycle – Coursera (2024)
- **UX & Communication**
 - User Experience Research and Design – Coursera (2024)
 - Academic English: Writing – Coursera (2024)
